

Fiat S.p.A. enters the ASPI Eurozone® index

Following recent confirmation of its inclusion in the Dow Jones World and Europe Sustainability Indexes and addition to the Global 500 Carbon Disclosure Leadership Index (CDLI) and Carbon Performance Leadership Index (CPLI), Fiat S.p.A. is now also a member of the ASPI Eurozone® index.

This latest recognition of the Group's sustainability performance provides further testimony that its commitment to society and the environment is perfectly integrated with its financial objectives and business approach.

The ASPI Eurozone® index includes the 120 best companies in the Eurozone selected on the basis of research conducted by VIGEO, European leader in assessing companies based on their social, environmental and governance practice and performance. The six areas analyzed are: environment, human rights, human resources, business behavior, community involvement and corporate governance.

The Advanced Sustainability Performance Eurozone Index ("ASPI Eurozone®") is recognized as one of the leading sustainability indexes and is used by the growing community of socially responsible investors to define sustainable investment universes, to benchmark their investment performance or to create index-linked products.
